1.0 INTRODUCTION

Linebach Funkhouser, Inc. (LFI) was retained by Lake Cumberland Area Development District (the Client), to conduct a Phase I Environmental Site Assessment (ESA) of the commercial property located at North Main Street in Burkesville, Cumberland County, Kentucky (the “subject property”). This assessment was completed as part of due diligence activities in relation to a potential real estate transaction.

1.1 Purpose

The purpose of this ESA was to document current and historical information on the subject property and surrounding areas in order to identify *recognized environmental conditions* (RECs), defined in ASTM E1527-13 & ASTM E1527-21 as the presence or likely presence of any hazardous substances or petroleum products in, on, or at the property: (1) due to a release to the environment; (2) under conditions indicative of a likely release to the environment; or (3) under conditions that pose a material threat of a future release to the environment.

The term is not intended to include *de minimis* conditions, defined in ASTM E1527-13 & ASTM E1527-21 as a condition related to a release that generally does not present a threat to human health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies. Conditions determined to be *de minimis* conditions are not *recognized environmental conditions* nor *controlled recognized environmental conditions*.

The term *historical recognized environmental condition* (HREC), is defined by ASTM E1527-13 & ASTM E1527-21 as a past release of any hazardous substances or petroleum products that has occurred affecting the property and has been addressed to the satisfaction of the applicable regulatory authority (as evidenced by the issuance of a no further action letter or other equivalent closure documentation) and meeting the current unrestricted use criteria established by a regulatory authority, without subjecting the property to any required controls (e.g., property use restriction, activity and use limitations, institutional controls, or engineering controls).

The term *controlled recognized environmental condition* (CREC), is defined by ASTM E1527-13 & ASTM E1527-21 as an REC resulting from a past release of hazardous substances or petroleum

products affecting the property and has been addressed to the satisfaction of the applicable regulatory authority (e.g., as evidenced by the issuance of a no further action letter or equivalent, or meeting risk-based criteria established by regulatory authority), with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls (e.g., property use restrictions, activity and use limitations, institutional controls, or engineering controls or other property use limitations).

1.2 Scope of Work

This ESA was conducted utilizing standard practices consistent with ASTM E1527-13 & ASTM E1527-21. Any significant scope-of-work additions, deletions, or deviations to ASTM E1527-13 & ASTM E1527-21 are noted below or in the corresponding sections of this report. The scope-of-work for this ESA included an evaluation of the following:

- General physical setting characteristics of the subject property and immediate vicinity through a review of one or more referenced sources, including topographic and geologic maps, soils and hydrologic reports.
- Historical usage of the subject property, adjoining properties, and surrounding area through a review of reasonably ascertainable sources such as land title records, fire insurance maps, city directories, aerial photographs, property tax files, prior environmental assessment reports, and interviews.
- Current land use and existing conditions of the subject property including observations and interviews regarding the use, treatment, storage, disposal or generation of hazardous substances, petroleum products and hazardous, regulated, or medical wastes; equipment that is known or likely to contain PCBs; storage tanks and drums; wells, drains and sumps; and pits, ponds or lagoons.
- Current land use of adjoining and surrounding area properties and the likelihood of known or suspected releases of hazardous substances or petroleum products to impact the subject property.
- Environmental regulatory database information and local environmental records within specified minimum search distances.

Unless otherwise identified in the report, the scope-of-work for this ESA did not include a consideration of the following potential environmental conditions that are outside the scope of ASTM Practice E1527-13 & E1527-21 including but not limited to: asbestos-containing building materials, biological agents, cultural and historic resources, ecological resources, endangered species, health and safety, indoor air quality (unrelated to releases of hazardous substances or

petroleum products into the environment), industrial hygiene, lead-based paint, lead in drinking water, mold, radon, regulatory compliance, emerging contaminants, and wetlands.

1.3 Terms and Conditions

This Phase I ESA was performed on behalf of, and solely for the exclusive use of the Client. No other company, entity, or person shall have any rights with regard to LFI's contract with the Client including but not limited to indemnification by LFI, or any rights of reliance on the findings, conclusions, and recommendations of this or any subsequent reports regarding the subject property.

In accordance with ASTM E1527-13 & ASTM E1527-21 provisions, this report is presumed to be valid for up to one year prior to the date of acquisition or transaction of the property. This presumption assumes that the report components, listed in the table below, are updated within 180 days prior to the intended date of purchase or prior to the dated of transaction of the property.

1.4 Assumptions, Limitations and Exceptions

This ESA was prepared in accordance with the scope and limitations of ASTM's *Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process* (ASTM E1527-13 & ASTM E1527-21), recognized by the U.S. Environmental Protection Agency (USEPA) as compliant with *Standards and Practices for All Appropriate Inquiries* (AAI) promulgated at 40 CFR Part 312.

This Phase I Environmental Site Assessment has been prepared to assess the property with respect to hazardous substances defined in the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA) (42 U.S.C. §9601), and petroleum products. As such, this assessment is intended to permit the Client to satisfy one of the requirements to qualify for the innocent

landowner, contiguous property owner, or bona fide prospective purchaser limitations on CERCLA liability: that is, the practices that constitute “all appropriate inquiry into the previous ownership and uses of the subject property consistent with good commercial or customary practice” as defined in 42 USC §9601 (35)(B).

LFI conducted this ESA using reasonable efforts to identify recognized environmental conditions on the subject property. Findings within this report are based on the information obtained during the site reconnaissance, the electronic regulatory file review, a review of historical records, interviews, and from reasonably ascertainable and publicly available information obtained from public agencies and other referenced sources. The presence of recognized environmental conditions on a site may not always be apparent; consequently, the completion of a Phase I ESA cannot provide a guarantee that recognized environmental conditions do not exist in connection with a site.

This report is not definitive and should not be assumed to be a complete or specific determination of all conditions above or below grade. Current subsurface conditions may differ from the conditions indicated by surface observations or historical sources and can be most reliably evaluated through intrusive techniques that were beyond the scope of this ESA. Information in this report is not intended for use as a construction document and should not be used for demolition, renovation, or other construction purposes. LFI makes no representation or warranty that the past or current operations at the site are, or have been, in compliance with applicable federal, state and local laws, regulations and codes.

Environmental Data Resources, Inc. (EDR), an independent environmental data research company, provided the records from the government agency databases referenced in this report. Information regarding surrounding area properties was requested for the specified minimum search distances and was assumed to be correct and complete unless obviously contradicted by LFI’s observations or other credible referenced sources reviewed during the ESA. LFI is not a professional title insurance or land surveying firm and makes no guarantee, explicit or implied, that any land title records acquired or reviewed, or any physical descriptions or depictions of the site in this report, represent a comprehensive definition or precise delineation of property ownership or boundaries.

2.0 SITE DESCRIPTION

The location, description, and current uses of the subject property, as well as surrounding properties are presented in the following sections.

2.1 Location and Description

The subject property is located at North Main Street in Burkesville, Cumberland County, Kentucky. The property consists of one rectangular-shaped parcel, identified by the Cumberland County Property Valuation Administration (PVA) records as follows:

Parcel / Property Summary

Address	Parcel ID	Owner	Size
0 North Main Street	065-00-00-006.02	Burkesville-Cumberland County Industrial Development Authority	93.19 acres

A site location map is provided in **Figure 1** and an aerial photograph depicting the site and surrounding property use is provided in **Figure 2**. Site photographs are included in **Appendix A**. The PVA records are included in **Appendix C**.

2.2 Structures / Improvements

The subject property is currently undeveloped farmland with no permanent structures. The majority of the property is open fields and wooded area. Multiple unpaved paths extend across the property.

2.3 Municipal Services and Utilities

The subject property and surrounding areas are serviced by the following municipal services and utilities:

Utility	Provider
Potable Water Supply	Burkesville City Water Department
Sewage Disposal	
Electricity	Tri-County Electric
Natural Gas	Burkesville Gas Company

2.4 Roads

The property is located at the eastern terminus of Duck Lane, a short access road from North Main Street. Primary site access is from Duck Lane. No public roads or streets are located on the property.

2.5 Topography and Drainage

The site is characterized by generally flat topography and the local topographic gradient is generally east. A review of the *Burkesville, Kentucky* United States Geological Survey (USGS), 7.5-Minute Topographic Quadrangle (2019) indicates a surface elevation for the subject property of approximately 580 feet above the National Geodetic Vertical Datum (NGVD) of 1929 (approximately mean sea level). A copy of the topographic map is provided in **Figure 1** and **Appendix B**. According to the United States Department of Agriculture (USDA) Soil Conservation Service (SCS), the dominant soil compositions in the vicinity of the subject property are classified as Monongahela, a moderately well-drained silt loam and Holston, a well-drained silt loam.

Major hydrogeologic features such as a river or lake generally influence regional groundwater flow direction. Surface and/or bedrock topography may also influence regional groundwater flow direction. Based on information gathered during the site visit, the topography of the land, and information contained in the Environmental Data Resources, Inc. (EDR) report, the direction of surface and groundwater flow is interpreted to be generally east with the local topographic gradient. The nearest downgradient surface water body is the Cumberland River, which forms the eastern boundary for the subject property.

2.6 Current Use of Property

The subject property is currently undeveloped farmland, as described in Section 2.2.

2.7 Current Use of Adjoining Properties

Nearby property usage could potentially impact the surface and subsurface conditions of a site. Developing a history of past to present uses or occupancies can provide an indication of the likelihood of environmental concern. In general, the subject property is in a low-density area predominantly composed of commercial and residential properties. An aerial photograph

illustrating the surrounding property use relative to the subject property is included as **Figure 2**. A general description of surrounding land use is as follows:

Current Use of Adjoining Properties

Direction	Description
North	Undeveloped farmland, single-family residences.
South	Undeveloped farmland, Cumberland County High School.
East	Cumberland River, wooded area.
West	Cumberland County Maintenance Garage, Cumberland County Bus Garage, North Main Street, single-family residences.

No visual evidence of potential adverse environmental conditions was observed during the survey of adjacent properties from the subject site.

3.0 SITE HISTORY AND HISTORICAL RECORDS REVIEW

Historical information about the subject property, based on an evaluation of available records reviewed during the Phase I, is included in the following sections.

3.1 Past Uses of Property

LFI attempted to determine the historical use of the subject property dating back to 1940 or the first developed use. The following table summarizes the historical use of the subject property:

Historical Use Summary

Subject Property		
Period	North Main Street	Source(s)
1950s - Current	The subject property has been historically undeveloped farmland since at least the 1950s.	Topographic Maps Aerial Photographs Site Interview

3.2 Past Uses of Adjoining Properties

The surrounding area has generally been undeveloped farmland and single-family residential since the early 1900s.

3.3 Topographic Maps

Historical topographic maps provide information related to physical land configuration such as elevation, ground slope, surface water and other features. While most buildings in densely

developed urban centers are not depicted, topographic maps typically show structures equal to or larger than the size of a single-family residence in rural areas. A search for historical topographic maps of the subject property and surrounding area was conducted by EDR and provided to LFI in a *Historical Topographic Map Report* dated June 6, 2022. Topographic maps were provided for various years between 1953 and 2019. A copy of the EDR report is included in **Appendix B** and summarized as follows:

Historical Topographic Maps

Year	Issues Noted	Observations
1953 - 1982	No	Subject Property: No structures or labels are visible. Surrounding Properties: Numerous structures are present, likely single-residences or commercial developments. North Main Street is visible.
2013 - 2019 ⁽¹⁾	No	Subject Property: No structures or identifying features are shown. Surrounding Properties: Major roads and highways are shown, no individual structures.

(1) Beginning with the 2010 map updates, the USGS elected to omit building footprints, urban designations, and other points of interest from topographic map updates.

3.4 Aerial Photographs

Aerial photographs are generally of very small scale and only provide a general idea of activity in the area. Aerial photographs are instantaneous records and their usefulness is limited because they do not necessarily reflect the condition of a site before or after the photographs were taken. A search for aerial photographs of the subject property and surrounding area was conducted by EDR and provided to LFI in an *Aerial Photo Decade Package* dated June 6, 2022. Aerial photographs were provided for various years from 1951 to 2016. A copy of the EDR report is included in **Appendix B** and a summary is presented in the following table:

Aerial Photographs

Year	Issues Noted	Observations
1951 - 1997	No	Subject Property: The property is undeveloped with no visible structures or improvements. Surrounding Properties: Surrounding properties are generally undeveloped farmland or single-family residential. The Cumberland County High School to the southwest is visible starting in 1975
2008 - 2016	No	Subject Property: The property is undeveloped as it appears today. Surrounding Properties: Adjoining properties are generally developed similar to their present-day configuration.

3.5 Sanborn® Fire Insurance Maps

A search for Sanborn fire insurance maps for the subject property and surrounding area was conducted by EDR and provided to LFI in a *Certified Sanborn Map Report*, dated June 6, 2022. Fire insurance maps were unavailable for the subject property and surrounding area. A copy of the EDR report is provided in **Appendix B**.

3.6 City Directories

A search of historical city directories for the subject property and surrounding properties was conducted by EDR and provided to LFI in a *City Directory Abstract* dated June 7, 2022. City directories for the subject property and surrounding area were reviewed for various years between 1992 and 2017. The subject property was not identified for any of the years reviewed. Listings for the surrounding area were found to be primarily residential and commercial listings with no evidence of potential adverse environmental conditions. A copy of the EDR report is provided in **Appendix B**.

4.0 ENVIRONMENTAL RECORDS REVIEW

An electronic database search of files maintained by the U.S. EPA and the Kentucky Department for Environmental Protection (KDEP) was conducted by EDR on June 6, 2022, to evaluate the regulatory history of the subject property and surrounding properties. The search of standard federal, state, and tribal regulatory agency databases was conducted to (1) identify listings for the subject property and adjoining properties and (2) evaluate sites within applicable ASTM E1527-13 & ASTM E1527-21 and AAI defined search radii that could cause actual or potential environmental impacts to the subject property. A summary of the results of the regulatory agency database search is provided in the following table:

Regulatory Database Search Summary

Regulatory Database	Minimum Search Distance (MSD)	Property Listed?	# Sites Listed w/in MSD
Federal National Priority Site List (NPL)	1 Mile	NO	0
Federal De-Listed (Delisted NPL)	½ Mile	NO	0
Federal CERCLIS list (SEMS)	½ Mile	NO	0
Federal CERCLIS NFRAP site list (SEMS-ARCHIVE)	½ Mile	NO	0

Regulatory Database Search Summary

Regulatory Database	Minimum Search Distance (MSD)	Property Listed?	# Sites Listed w/in MSD
Federal RCRA CORRACTS facilities list (CORRACTS)	1 Mile	NO	1
Federal RCRA non-CORRACTS TSD facilities list (RCRA-TSDF)	½ Mile	NO	0
Federal RCRA Generators (RCRA-LQG, RCRA-SQG, RCRA-VSQG)	Subject and/or adjoining	NO	0
Federal Institutional/Engineering Control Registry (LUCIS, US ENG CONTROLS, US INST CONTROLS)	Subject	NO	0
Federal ERNS list (ERNS)	Subject	NO	0
State/Tribal Haz. Equivalent CERCLIS (SHWS)	1 Mile	NO	5
State/Tribal Landfill or Solid Waste Disposal Sites (SWF/LF)	½ Mile	NO	0
State/Tribal Leaking Storage Tank Lists (LUST, PSTEAF, SB193)	½ Mile	NO	1

State/Tribal Institutional/Engineering Control Registry (IC/EC)	Subject	NO	1
State/Tribal Voluntary Cleanup Sites (VCP)	½ Mile	NO	0
Federal/State Brownfield Management System (BROWNFIELDS)	½ Mile	NO	0

The fact that sites do or do not appear on a list does not necessarily indicate that an environmental concern exists. In addition, sites may not be mapped in a list search due to inaccuracy of owner/operator records, government records, or errors occurring during conversion of the data by informational sources. A copy of the EDR report, which includes a detailed description of each database and the results of the database inquiries, is provided in **Appendix D**.

4.1 Listings for Subject Site or Adjoining Properties

The EDR database search did not identify the subject property on any ASTM/AAI required databases. One adjoining property was identified as follows:

1. **Cumberland County State Maintenance Garage (AI# 877)**
Address: 192 Garmon Ferry Rd (0.112 mile)
Relative Elevation: Higher
ASTM/AAI Databases: UST, SHWS, INST Controls
Non-ASTM/AAI Databases: None
Database Summary:

UST – Records provided by EDR and the KDEP Underground Storage Tank Branch (USTB) indicate that the following UST systems were formerly located on the property:

Tank #	Status	Installation Date	Closure Date	Tank Contents	Capacity (gallons)	Tank Material	Spill/Leak Detection
1	TRM ¹	1983	1996	Gasoline	2,000	SWS ²	N/A
2	TRM	1981	1996	Diesel	2,000	SWS	N/A
3	TRM	1977	1996	Gasoline	1,000	SWS	N/A
4	TRM	1977	1996	Diesel	1,000	SWS	N/A
5	TRM	1972	1996	Diesel	2,000	SWS	N/A
5	TRM	1981	1996	Gasoline	2,000	SWS	N/A

1. Tank Removal Verified
2. Single Wall Steel

According to documents provided by USTB and EDR, all six USTs were removed in June of 1996. A No Further Action (NFA) letter dated August 12, 1997, was issued for all six UST systems. This letter is provided in Appendix F. Based on this information, this listing does not represent a REC for the subject property.

SHWS – The subject property is currently listed as a “managed” State Hazardous Waste Site. According to information provided by KDEP, this facility formerly operated an in-ground hydraulic lift that leaked hydraulic oil into the soil. Various site investigations were conducted to determine the extent of the contamination. As part of the managed closure, an Environmental Covenant (EC) was recorded on May 10, 2010, for the property restricting the future use of the property and restricting the use of the soil and groundwater. The Option B Managed Closure letter was issued following the EC dated October 12, 2010. The Option B closure letter and other pertinent documentation is provided in **Appendix F**. Based on this information, this listing does not represent a REC for the subject property.

INST CONTROLS – Institutional Controls Sites List. A listing of closed sites in the State Superfund Database. Institutional controls would be in place at any site that used Contained or Managed as a closure option. This listing is associated with the SHWS listing above for the Environmental Covenant and does not represent a REC for the subject property.

4.2 Listings Within the Established Search Radii

The EDR database search did not identify any listings within the established search radii (<0.1 mile) that are considered up-gradient from the subject property on ASTM or AAI required databases. Six additional site listings were identified on ASTM or AAI required databases in the EDR radius report. However, the identified listings do not appear to present an obvious release or impact to the property, based on:

- information contained in the regulatory databases;
- information obtained during our site visit;

- relative gradient to the subject property using the EDR Groundwater Flow Tool;
- regulatory status of the listed facility, and;
- distance and/or relative elevation of the listed site from the subject site (>0.1 mile).

The EDR environmental records search also provides a list of “orphan” sites, which are properties identified on ASTM/AAI required databases but that could not be mapped due to poor or inaccurate address information. EDR’s records search listed one orphan site. This site is located over 0.1-mile from the subject property and does not represent a REC.

4.3 Vapor Encroachment Screen

LFI conducted a Vapor Encroachment Screen (VES) utilizing the Tier 1 methodology provided in ASTM’s *Standard Guide for Vapor Encroachment Screening on Property Involved in Real Estate Transactions* (E2600-15). The Tier 1 methodology in E2600-15 was utilized in order to identify a *Vapor Encroachment Condition* (VEC), which is “the presence or likely presence of chemicals of concern (COC) (i.e. – petroleum hydrocarbons and/or chlorinated solvents) vapors in the vadose zone of the subject property caused by the release of vapors from contaminated soil and/or groundwater either on or near the subject property.” Information provided by EDR was reviewed to identify facilities within the Area of Concern (AOC) to evaluate the potential for contamination from nearby properties to represent a vapor encroachment condition (VEC) to the Site. The AOC for chlorinated solvents is defined in ASTM E2600-15 as the area within 1/3 mile of the property boundaries. For facilities at which the only COCs are petroleum hydrocarbons, the AOC includes the area within 0.1 mile of the property boundaries.

A review of historical use information and regulatory database documentation collected in the course of this Phase I ESA did not identify obvious sources of COCs with the potential to migrate as vapors on or onto the subject property. Therefore, our opinion based on the Tier 1 VES is that a VEC does not exist on the property.

5.0 SITE RECONNAISSANCE

A site reconnaissance was conducted on June 13, 2022, by Mr. Andrew Bergman, Project Geologist with LFI. Mr. Bergman was unaccompanied during the site reconnaissance.

5.1 Site Reconnaissance Methodologies

The purpose of the reconnaissance was to gather information regarding the environmental conditions at the subject property and surrounding areas. The site reconnaissance consisted of visual observations of the subject property and any existing improvements, adjoining properties as viewed from the subject property, and observations of nearby properties made from public thoroughfares.

At the time of the site reconnaissance, weather conditions were sunny and approximately 95° Fahrenheit. No limiting conditions were present for the site visit. Photographs taken during the site reconnaissance, depicting site conditions at the time of the visit, are provided in **Appendix A**.

5.2 Hazardous Substances/Waste and Petroleum Products

No obvious indications of generation, use, storage, treatment, or disposal of hazardous substances/wastes or petroleum products were observed during site reconnaissance.

5.3 Underground Storage Tanks (USTs) & Aboveground Storage Tanks (ASTs)

The site reconnaissance included a search for physical features such as fill ports, slumped pavement/ground surface, patched pavement, and evidence of underground piping or pump stations commonly associated with the current or historical presence of storage tanks. The absence of common physical features cannot completely rule out the current or historical existence of storage tanks. Site characteristics such as overgrown vegetation, new pavement, or past renovation/construction/demolition activities may prevent the identification of storage tanks.

5.3.1 Underground Storage Tanks (USTs)

No evidence of any current or former UST systems was identified during the site reconnaissance, a review of radius information, historical research, or from the property representative interview.

5.3.2 Aboveground Storage Tanks (ASTs)

No evidence of any current or former AST systems was identified during the site reconnaissance, a review of radius information, historical research, or from the property representative interview.

5.4 Odors

No strong, pungent, or noxious odors, indicating the release of chemicals or petroleum products, were observed during the site reconnaissance.

5.5 Drums and Containers

No drums or containers were observed during the site reconnaissance.

5.6 Polychlorinated Biphenyls (PCBs)

Polychlorinated biphenyls (PCBs) are organic compounds that have been used extensively in electrical capacitors and transformers, lighting ballasts, hydraulic fluids, heat exchange fluids, lubricants, inks, sealants, adhesives, and surface coatings since development in 1929. PCB production was banned in the U.S. in 1979 due to health and environmental hazards. Under the Toxic Substances Control Act (TSCA), as outlined in Title 40 of the Code of Federal Regulations (CFR) Part C, 761, the owners of PCB containing equipment are responsible for environmental impairment and liabilities caused by leakage of PCBs to the environment.

Multiple pole-mounted transformers were observed along North Main Street. These are reportedly owned by the local utility company. No other equipment with the potential to contain PCBs was identified during our site reconnaissance.

5.7 Drains and Sumps

No drains or sumps were observed or reported during the site reconnaissance.

5.8 Pits, Ponds, and Lagoons

No obvious evidence of pits, ponds or lagoons used for waste treatment or disposal was observed during the site reconnaissance or reported during the representative interview.

5.9 Stained Soil / Pavement

No obvious stained soil/pavement was observed during the site reconnaissance.

5.10 Stressed Vegetation

No obvious areas of stressed vegetation were observed on the site.

5.11 Waste Generation, Storage, and Disposal

No obvious evidence of improper waste generation or storage was observed during the site reconnaissance.

5.12 Wastewater

No obvious evidence of process wastewater discharge into a drain, ditch, or stream was observed during the site reconnaissance or reported during the interview.

5.13 Wells

No obvious evidence of industrial-use or groundwater monitoring wells was observed or reported to be located on the subject property during the site reconnaissance. The EDR report did not identify any wells on the subject property.

5.14 Septic Systems

No septic systems were observed or reported during the site reconnaissance.

6.0 INTERVIEWS

The following interviews were conducted during the assessment to obtain information indicating potential RECs in connection with the subject property.

6.1 Property Representative

Mr. Elijah Wilson, representative for the Burkesville-Cumberland County Industrial Development Authority, was interviewed during a phone call with Mr. Andrew Bergman on June 24, 2022. At that time, Mr. Wilson stated that he was not aware of any undisclosed environmental issues associated with the property.

6.2 Occupants

The subject property does not have any occupants.

6.3 Local Government Officials

Local government officials were contacted, or government websites accessed as follows:

Entity	Description
Cumberland County Property Valuation Administrator Records	The property assessor's records were accessed via the county web portal, to obtain information about the property. A copy of the assessor's record is provided in Appendix C .
Kentucky Department for Environmental Protection (KDEP)	KDEP regulatory files were reviewed through the EDR Radius Report and a FOIA request. Pertinent documents are referenced in Section 4.1 .

7.0 NON-SCOPE CONSIDERATIONS

The following sections address environmental issues or conditions on the subject property that are outside the scope of ASTM E1527-13 & ASTM E1527-21. Substances or materials not defined by CERCLA as hazardous substances may be present on the subject property that may lead to contamination of the subject property.

7.1 Asbestos Containing Materials (ACMs)

Asbestos is a general term for a group of fibrous minerals (primarily chrysotile, amosite and crocidolite) that have long been used as fireproof insulation and as a strengthener in pipe insulation, roofing tiles, floor tiles, wall coverings and other materials. Undisturbed asbestos-containing material (ACM) is not dangerous; however, when ACM is broken or torn, as during remodeling or demolition, the fibers can be spread into the air, especially if the material is friable. A friable material, by definition, is one that can be crushed, crumbled, pulverized, or reduced by hand pressure when dry. Due to health hazards, ACM use has been phased out since approximately 1978. The U.S. EPA classifies ACM as any material which contains more than 1% asbestos by Polarized Light Microscopy (PLM) analysis.

An ACM survey was not included in the scope of work for this assessment. Based on the lack of permanent site structures, ACM is unlikely to be present.

7.2 Lead-Based Paint (LBP)

Use of lead in household paint was banned by the U.S. EPA effective January 1, 1978. The U.S. EPA and the U.S. Department of Housing and Urban Development (HUD) define lead-based paint (LBP) as any paint that contains 1.0 mg/cm² or higher of lead by x-ray fluorescence (XRF) analysis or 0.5% (5,000 ppm) lead by weight.

An LBP survey was not included in the scope of work for this assessment. Based on the lack of permanent site structures, LBP is unlikely to be present.

7.3 Undefined Emerging Contaminants

“Emerging contaminants” (ECs) are substances not currently defined as hazardous under CERCLA, that non-environmental professionals and others may assume to be “hazardous.” ECs include biologically derived by-products such as methane and substances about which human understanding is evolving, such as per and polyfluoralkyl substances (PFAS).

No specific sources of biologically derived by-products or PFAS were identified from the site reconnaissance, a review of historical and radius data, or from an interview with the property representative.

8.0 USER PROVIDED INFORMATION

In accordance with the ASTM E 1527-13 & E1527-21 and AAI standards, the user of this ESA, Lake Cumberland Area Development District (the Client), may obtain information through other due diligence activities that could help identify the possibility of potential environmental conditions in connection with the subject property. A copy of the completed questionnaire form is provided in **Appendix E**.

8.1 Environmental Liens or Activity and Use Limitations

The Client has indicated that they are unaware of any issues regarding environmental liens or use limitations.

8.2 Common/Specialized Knowledge or Experience

The Client has indicated that they do not possess common/specialized knowledge or experience relative to the subject property.

8.3 Reasons for Significantly Lower Purchase Price

The Client has indicated that they are unaware if the purchase price is of fair market value for the subject property.

9.0 DATA GAPS

No data gaps, as defined by ASTM E1527-13 & ASTM E1527-21, (i.e., considered to have significantly affected the ability to identify recognized environmental conditions in connection with the subject property) were identified during completion of this assessment.

10.0 FINDINGS AND OPINIONS

The following summarizes known or suspected RECs, HRECs, CRECs, *de minimis* conditions, and non-scope environmental conditions in connection with the subject property based on information collected during the assessment. For each condition, LFI provides an opinion of the impact on the site based on an evaluation of the results of record reviews, site reconnaissance work and interviews performed as part of this assessment. LFI also provides a rationale for concluding that an environmental condition is or is not a REC.

Recognized Environmental Conditions (REC)

This assessment has revealed no evidence of RECs in connection with the subject property.

Historical Recognized Environmental Conditions (HREC)

This assessment has revealed no evidence of HRECs in connection with the subject property.

Controlled Recognized Environmental Conditions (CREC)

This assessment has revealed no evidence of CRECs in connection with the subject property.

De Minimis Conditions

No *de minimis* conditions were identified in connection with the subject property.

Non-Scope Environmental Conditions

No non-scope environmental conditions were identified in connection with the subject property as presented in Section 7.0.

11.0 CONCLUSIONS AND RECOMMENDATIONS

LFI has completed a Phase I Environmental Site Assessment of commercial property located at North Main Street in Burkesville, Cumberland County, Kentucky, the subject property. This

assessment was completed in conformance with the scope and limitations of ASTM Practice E1527-13 & E1527-21. Any exceptions to, or deletions from, this practice were described in this report. This assessment has revealed no evidence of *recognized environmental conditions* in connection with the property as identified above. Therefore, LFI recommends no further investigation

12.0 CERTIFICATION OF ENVIRONMENTAL PROFESSIONAL

LFI has the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the subject property. We have developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312. We declare that, to the best of our professional knowledge and belief, we meet the definition of Environmental Professional as defined in §312.10 of this part.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.

Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal NPL (Superfund) sites

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly known as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Lists of Federal CERCLA sites with NFRAP

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be potential NPL site.

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General East

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.

HYDROGEOLOGIC INFORMATION

AQUIFLOW^R Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

PHASE I ESA – AAI USER QUESTIONNAIRE (ASTM E1527-05)

Presented below is the User Questionnaire cited in Appendix X3 of ASTM E1527-05. In order to qualify for one of the Landowner Liability Protections (LLPs) offered by the Small Business Relief and Brownfield's Revitalization Act of 2001 (the "Brownfield's Amendments"), the User must provide the following information (if available) to the environmental professional. Failure to provide this information could result in a determination that "all appropriate inquiry" is not complete.

Subject Property: _____ LFI Project No: _____

1. Environmental Cleanup Liens

Are you aware of any environmental cleanup liens against the property that are filed or recorded under federal, state, tribal or local law?

Yes No Unknown

2. Activity and Use Limitations (AULs)

Are you aware of any AULs, such as engineering controls, land use restrictions, or institutional controls that are in place at the site and/or have been filed or recorded in a registry under federal, state, tribal or local law?

Yes No Unknown

3. Specialized Knowledge or Experience

Do you have any specialized knowledge or experience related to the subject property or surrounding properties? For example, are you involved in the same line of business as the current or former occupants of the subject property or an adjoining property so that you would have specialized knowledge of the chemicals and processes used by this type of business? Do you have documentation (e.g. – Phase I ESAs, Phase II subsurface investigations, tank removal/closure reports, remedial reports, asbestos & lead-based paint sampling and/or abatement reports, etc.) for the subject property that may be relevant to this Phase I ESA?

Yes No Unknown

Comments:

4. Relationship of Purchase Price to Fair Market Value

Does the purchase price being paid for the subject property reasonably reflect the fair market value of the property?

Yes No Unknown

If you conclude that there is a difference, have you considered whether the lower purchase price is because contamination is known or believed to be present at the property?

Yes No

Comments:

5. Commonly Known or Reasonably Ascertainable Information

Are you aware of commonly known or reasonably ascertainable information about the subject property that would help the environmental professional to identify conditions indicative of releases or threatened releases? For example, as User:

- a. Do you know the past uses of the property?
- b. Do you know of specific chemicals that are present or once were present at the property?
- c. Do you know of spills or other chemical releases that have taken place at the property?
- d. Do you know of any environmental cleanups that have taken place at the property?

Comments:

6. Obvious Presence or Likely Presence of Contamination

As the User of this ESA, based on your knowledge and experience related to the subject property, are there any obvious indicators that point to the presence or likely presence of contamination at the subject property?

Yes No Unknown

Dear Mr. Lawson,

I am writing on behalf of the Kentucky Energy and Environment Cabinet's Division of Waste Management (the Division). On May 10, 2010, twenty-one Environmental Covenants were signed by the Commonwealth of Kentucky (the Grantor), and recorded on various dates in the indicated County Clerk's offices, which restricts certain uses for property that you currently own at the above listed locations.

Pursuant to the terms of the Environmental Covenant, you are required to submit an annual report to the Director of the Division, on the anniversary of the date this Covenant was signed by the Grantor, detailing your compliance or lack of compliance with the terms of the Covenant. Your annual certification will be due on May 10, 2022.

As a reminder, an environmental covenant states, "Owner shall notify the Director of Kentucky Division of Waste Management at least thirty (30) days in advance of any proposed grant, transfer, or conveyance of any interest in any or all of the property." This notification needs to be a formal letter stating the intended sale date and the name, address and phone number of the potential buyer. A copy of the proposed deed needs to be included with the letter.

If you have any questions, or want to discuss this matter further, please contact me at (502) 782-1225. Thank you for your attention to this matter.

Sincerely,

A handwritten signature in black ink, appearing to read "Jennifer Cowan", with a long, sweeping flourish extending to the right.

Dear Mr. Smith:

The Division of Waste Management personnel have reviewed the information submitted on July 19, 1996 and May 22, 1997 and the Classification Guide signed and certified on July 8, 1996 and the information contained in the Closure Assessment Report signed on July 8, 1996 on behalf of The Commonwealth of Kentucky Transportation Cabinet. This data indicates that no concentrations of hydrocarbon constituents for which you analyzed remain within the site above soil cleanup levels in Class III, Soil Table 1 of 401 KAR 42:070(E) and 080(E).

From your analyses, the Division agrees that this site has satisfied the requirements of Kentucky Revised Statues 224.60-105 and Kentucky Administrative Regulation 401 KAR 42:070(E) and 42:080(E). Therefore, no further action is required, at this time, in response to a Closure Assessment request by the Division.

The Division has based this determination on information submitted by The Commonwealth of Kentucky Transportation Cabinet/Underground Petro Equipment and reserves all rights to require additional monitoring or testing and to take whatever action is necessary to protect public health and the environment if the Division determines there is need for further investigation.

Note: All monitoring wells shall be properly abandoned in accordance with 401 KAR 6:310 within thirty (30) days from the date of determination that the monitoring well is unsuitable for use as a monitoring well or within thirty (30) days of receiving a no further action letter from the Cabinet.

Payment of any outstanding underground storage tank fees is still required pursuant to KRS 224.60-150. Failure to pay any said outstanding fees may compromise the ability of the facility to qualify for financial assurance from the Office of Petroleum Storage Tank Environmental Assurance Fund. If outstanding fees are due, you will be contacted by the Underground Storage Tank Branch.
